PREFACE

Furnished by N. B. ReMine,
Secretary Bristol Board of Trade, Bristol, Va.-Tenn.

Population Census 1910
(Federal Census)

Bristol, Va	6,247
Bristol, Tenn	7,148
Total	13,395

Estimated population 1915, 20,000.

Bristol's growing importance as a commercial and industrial center may be considered as dating from the beginning of the present century. The fifteen years from that date have been crowded with business activity. The population has increased steadily. The Federal census do not give credit for anything like the number of people that are actually a part of the population. Suburban districts included, the city's population may now be conservatively estimated at 20,000.

Being on the dividing line between Virginia and Tennessee, Bristol occupies a unique and striking position, and one that is rich with promise. The great "Inland Empire" of America clusters about this community. Within a radius of one hundred miles, embracing counties in East Tennessee, Southwest Virginia, Eastern Kentucky, Western North Carolina and Western West Virginia, lies a wealth of natural resources the like of which does not exist in any similar territory throughout the bounds of the country. Coal, timber, iron, zinc, copper, manganese, lead barytes, limestone, shale, clays, yellow Tripoli, phosphate rock, etc., is found either in abundance or in commercially paying quantities. Added to this wealth of timber and mineral resources is a soil that is as fertile as may be found in any portion of the south, and adapted to a great variety of crops, including grains, grasses, alfalfa, etc. This vast panorama of natural wealth has barely been "pecked at." It offers abundant opportunities to capital, and the time is not distant when it will receive due recognition, and practically every line

PREFACE

of enterprise embraced in the natural resources mentioned will have found profitable investment here.

In the past fifteen years Bristol has made steady and substantial strides as an industrial and commercial city. The commercial interests have shown an advancement from year to year of from 10 to 15 per cent, while the manufacturing interests have gained at the rate of from 8 to 10 per cent. Substantial gains were shown the past year in spite of unfavorable world conditions due to the European war. Bristol jobbing houses alone did a business of nearly \$9,000,000. This means, based upon conservative estimates, that Bristol's commercial business during the past year amounted to \$15,000,000. The jobbing houses and larger retail stores gave employment to nine hundred and seventy persons and paid \$686,307 to labor. Capital invested in jobbing amounts to \$3,330,752.

The manufacturing concerns did a business of \$4,202,783. They gave employment to 2,986 persons and paid to labor \$999,047.

The postoffice receipts for 1914 were, 78,764.79, an increase over 1913 of \$8,118.59. The bank deposits have increased upwards of \$1,000,000 each year for the past four years. The increase for the fiscal year ending April, 1915, was \$591,554. Capital invested in manufacturing amounts to \$1,927,300.

One feature that has in recent years been of great aid to Bristol commercially is the system of stone highways that radiates in all directions. Through the efforts of the Board of Trade and the personal work of Henry Roberts, highway work has progressed with wonderful speed in the last eight years. Counties within a radius of 100 miles have in that time appropriated and expended in excess of \$8,000,000 for macadam highways. These roads are more than local, as most of them have outlets to other sections of the country. This is due to the promotion by our people of work on such through highways as the Bristol-to-Memphis highway, the Bristol-to-Washington Highway, the Bristol-Coal fields highway, the Bristol-Lexington highway, the Bristol-Mountain City and Crest of the Blue Ridge highway, the Bristol-Linville-Blowing Rock highway, the Bristol-Bluefield-Pittsburgh highway, and others.

With such a combination of mountains and valleys as form Bristol's environment, it is not surprising that there has sprung up here a splendid city, with ever enlarging opportunities and prospects. The conditions have been favorable not alone to commercial and industrial development, but from the standpoint of civic and home life. Under the most promising stretch of skies in any portion of the Southland, Bristol has become a city of inviting proportions.

Paramount with Bristol's railway and highway facilities, to which her wonderful growth and progress are largely due, is the climate. This country does not perhaps afford more inviting cli-

PREFACE

matic conditions from the viewpoint of health and comfort than is found here in this picturesque valley country among the foothills of the Appalachians. The temperature throughout the year compares closely with the Asheville climate, which has been advertised to the world as the acme of perfection.

Bristol, by virtue of its altitude and location in the mountains, has considerable advantage as a tourist center and undoubtedly with further development along this line in the next few years, will become one of the foremost resorts in the Appalachians.

The railroads have already recognized the superior advantages afforded by Bristol from the tourist's viewpoint and have put into effect rates for the tourist season from all Eastern, Northern, Southern and Southwestern points. Ample hotel accommodations are to be had, and several places of interest and entertainment are open for the summer each year including Big Creek Park and Island Park.

Bristol enjoys the reputation of being the center of widely advertised good roads activity and is rapidly becoming the headquarters for the good roads movement in the Central South. All good roads projected in the central section of the South lead to Bristol. Bristol is the common point for all tourists over the roads of this section, on account of the road improvement throughout this section.

Bristol in the near future will be the center also of a thriving community of small farmers by reason of the good roads activity. Already a great many farmers have been attracted to this section because of the fertility of soil and the accessibility of markets.

Commission government is in operation on the Tennessee side of the dual city while a mayor and city council are in power on the Virginia side.

The municipal water works system is fed by three springs located adjacent to the city limits. Absolutely pure water is provided by this means, and frequent tests are made in order to insure the community against contaminated water. Every public utility is found in Bristol.

With three colleges—King for young men and Sullins and Virginia Interment for young women, as a public school system ranking among the best in the country, educational needs are amply cared for. King College is a Presbyterian institution, while Sullins is a Methodist school and Virginia Interment a Baptist.

Three railroads and a narrow gauge line enter the city and more than 500,000 passengers pass yearly through the Bristol union station gateway. Some of the best trains operating between extreme Southern points and the North and East pass through Bristol daily. Every facility for the expert handling of tonnage, local and foreign, is provided by the railways, the Southern, the Norfolk & Western, the Virginia & Southwestern and the Holston Valley

PREFACE

Large coal fields to the northwest of the city send an enormous tonnage through Bristol each year, while the vast timber tracts surrounding the city on every side make the city a lumber market ranking among the first in the country.

Among the manufactured products turned out daily in Bristol are paper pulp, tanned leather, wood extracts, coffins and caskets, metal siding, ceiling, shingles, metal polish, spotless cleanser, boxes, crates, fine hardwood finishings, spokes, flour, meal, stoves, machine and foundry products including mine car wheels, overalls, workshirts, pharmaceutical products, several patent medicines, boilers, bonded whiskies, books and loose leaf binders, washboards, trunks, brooms, mattresses, cement blocks, pumps, ice, ice cream and many other products.

With the Watauga River harnessed near Elizabethton, Tenn., Bristol is given the advantage of cheap hydro-electric power. Manufacturers are provided with electric power at a low rate; water is cheap, labor is plentiful in the surrounding sections and can be brought to Bristol whenever needed; living is about 10 per cent. less in cost than most Southern cities, the death rate is among the lowest in the country.

Every known farm product raised in the temperate zone can be grown in the beautiful surrounding country. In addition to farm products there are excellent grazing lands, and fruit abounds when properly cultivated. The farmers in this section are among the most independent people in America, and make in addition to a comfortable living each year, something for a rainy day.

Bristol has opened to the world the largest White Way system enjoyed by any city of its size in the world. It consists of slightly in excess of 200 standards most of which hold five lights, and lights up the entire business section of the city and Anderson Park as well as the two city halls.

Bristol, a top of the Appalachians, and looking down upon fair sisters of the valleys and lowlands, has oftentimes occasion to do a little civic smiling when she considers her many natural advantages and what the art of man has done for her in addition. There have been those who complained but spending some of their money in railroad fares always has the effect of bringing back the smile of pride in the intermountain city. Many have gone forth to other climes but invariably return to good old Bristol if they have the opportunity of doing so; and upon returning, gaze in wonder at the many new works, the many new faces, and the quickened manifestations of public spirit.

City Directory Don'ts

DON'T put your Directory in an out of the way place, but keep it in a place that your customers can see and use it without stopping some ONE to find it.

DON'T think that a Directory is paying for itself unless you use it more than an idle clerk can make you money.

DON'T look mad when a customer asks to look at your Directory.

DON'T look happy when a neighbor wants to borrow your Directory, for if you do, he will borrow again and if all were borrowers, when would the next Directory be published?

DON'T forget that an up-to-date city must have a Directory and a merchant that has no DIRECTORY is what?

DON'T forget that a Directory borrower to-day will forget to return it to-morrow and you call him what?

DON'T forget that the man who has a Directory pays for it and the borrower gets for nothing what another man pays for. What do you call him?

When a man advertises his business it is conclusive that he is not ashamed of it, especially if he does his advertising in the Raleigh City Directory.

100 Bushels of Corn Per Acre Easy

The above yield can be made by using the best fertilizers--in addition to your best seed selection, proper planting, and thorough working of the crop.

Use
Virginia=Carolina
High-Grade
Fertilizers

(the best fertilizers made), and they will help you to get this excellent yield; but a great deal depends upon you, as explained in our new FARMERS' YEAR BOOK. This you can get on request of your dealer, or by sending us your name and address.

Fine Crops of Tobacco

can be raised if the ground is properly prepared before setting out the plants, and you liberally

Use
Virginia=Carolina
High-Grade
Fertilizers

Then you should nourish the crop at frequent intervals during the growing period with the same plant food. Work well, being careful to feed the crop with only Virginia-Carolina Fertilizers, made especially for tobacco. This will insure a big crop of fine, high-grade tobacco that will yield big money.

Profitable farming is fully explained in our new free FARMERS' YEAR BOOK, or almanac, and it is yours for the asking.
